

School Assembly – Guidance Note

The theme for Shared Education Week 2018 is: 'Sharing the present...Shaping the future'.

The Assembly for Shared Education Week 2018 is designed so it can be adapted to suit the ages and needs of the students in your partnership. The assembly is structured to allow you to share your partnerships story, successes and future plans as well as set it within the wider context of Shared Education.

The assembly is in two sections:

1. Wider context of Shared Education and its history;
2. The story of your partnership.

Section 1 includes a script and images which are ready for use but you may wish to adapt to best suit your audience. Section 2 contains the framework and guidance for you to tell the story of your partnerships successes and plans for the future.

The script for the assembly is in the notes of the PowerPoint.

Involving students in the assembly

- You could assign sections of the script to pupils;
- In the section relating to the story of your partnership you could ask students to speak briefly about what they did in their shared classes and what they enjoyed about Shared Education;
- Quotes from students; and
- Students could be invited to showcase work completed through Shared Education.
